

PDF verification teaching fixture - OLD VERSION

Synthetic document only. No customer information.

Project approval note

Approval table

Budget authorization	USD 12,500

Formatting-only check

PROJECT TIMELINE

The words above stay the same. The new version uses bold type.

Scan-quality/OCR warning (teaching label)

The source image may be faint or skewed. Check the rendered page against extracted text.
Do not rely on OCR alone for consequential language or numbers.

Source-check cue: verify the table label, amount, currency, and surrounding context.

Acceptance paragraph

The project manager verifies the final acceptance record before approval.
The same paragraph moves to page 2 in the new version without wording changes.

Appendix - source check

Review both versions before approval.

Checklist

1. Confirm the older and newer file identity.
2. Open both sources at each consequential finding.
3. Check rendered scan pages when OCR quality is uncertain.
4. Record unresolved uncertainty instead of treating it as a clean result.

The acceptance paragraph is on page 1 in the older version.
